

FINASLIP EZY

DESCRIPTION : Specialty torque release additive for PP based caps & closures

SPECIFICATIONS : Appearance : Microbeads
Melting point : 85±3 deg C

(Slight variations in the specifications stated due to raw materials and production conditions are possible though they have no influence on the application properties described.)

APPLICATIONS : - FINASLIP EZY is a specially developed torque release additive for injection moulded PP caps for bottles.
- FINASLIP EZY is not suitable for PP/PE films.

PROPERTIES : - Excellent torque release performance in PP caps
- Offers superior stability & thus, better organoleptic properties than the conventional torque release additives
- Improved mould release properties
- Reduces cycle time - Increases production output

METHOD OF USE : By preparing a masterbatch

USE LEVEL : Minimum 0.5% in the end application
(as per end-use requirements)

STORAGE : It may form soft agglomerates during transit/storage depending upon its particle size, compaction caused during stacking of material and prevailing atmospheric temperatures during transit/storage conditions due to its fatty nature & inherent characteristics. Finer the particle size more can be such agglomeration. However, this agglomeration does not affect the product's performance. These soft agglomerates can be broken easily if necessary.
