

FINASPERSE 24K

DESCRIPTION : 100% active wetting and dispersing additive

SPECIFICATIONS : Appearance : Flakes
Melting point : $49 \pm 3^{\circ} \text{C}$

(Slight variations in the specifications stated due to raw materials and production conditions are possible though they have no influence on the application properties described.)

APPLICATIONS : Excellent wetting and dispersing agent for:

- Flexo and Gravure ink
- Digital printing ink
- Coil coating
- Protective coating
- Pigment concentrated
- Industrial OEM coating
- Building and construction Coating

PROPERTIES :

- Higher colour strength with better stabilization
- High transparency
- Low viscosity; thereby, can offer suitable stability
- Effective particle size reduction post milling process
- Superior colour enhancement
- Possibility of high pigment loading
- Improved milling efficiency

USE LEVEL : 10 to 20% on weight of pigment

STORAGE : It may form soft agglomerates during transit/storage depending upon its particle size, compaction caused during stacking of material and prevailing atmospheric temperatures during transit/storage conditions due to its fatty nature & inherent characteristics. Finer the particle size more can be such agglomeration. However, this agglomeration does not affect the product's performance. These soft agglomerates can be broken easily if necessary.
