

FINAFLEX 1200

DESCRIPTION : 100% biobased phthalate-free plasticizer for PVC & Biopolymers (such as PLA)

SPECIFICATIONS : Appearance : Liquid (at 30 deg C)

(Slight variations in the specifications stated due to raw materials and production conditions are possible though they have no influence on the application properties described.)

APPLICATIONS : 100% bio-based phthalate-free non-toxic plasticizer recommended for critical PVC applications like toys and other food packaging applications

PROPERTIES :

- Primary plasticizer having excellent compatibility with PVC
- Superior plasticizing efficiency as compared to conventional plasticizer such as DEHP.
- Effective low temperature flexibility
- Lower compounding time; therefore, offers improved output & likely energy savings
- Helps to achieve lower initial viscosity and imparts better viscosity stability in PVC paste grade resin
- FinaFlex 1200 is **safe to handle** does not require special handling
- FinaFlex 1200 is fully biodegradable

USE LEVEL : Based on the end-requirement (being primary plasticizer, it is highly compatible with the base polymer)

STORAGE : It is recommended to store this product at room temperature. At lower temperature, it may crystallize due to its inherent characteristics. The crystallization is reversible when heated and has no influence on application properties.
