

FINALUX G 701

DESCRIPTION : Compatible external lubricant for PVC

SPECIFICATIONS : Appearance : Microbeads
Melting point : 55 ± 5 deg C

(Slight variations in the specifications stated due to raw materials and production conditions are possible though they have no influence on the application properties described.)

APPLICATIONS :
- Rigid PVC transparent calendared films/sheets
- Blown rigid PVC films
- Rigid PVC films and sheets by T-die extrusion
- Rigid PVC profiles
- Rigid PVC injection moulded parts (high Vicat point)
- Foamed rigid PVC profiles/sheets

PROPERTIES : FINALUX G 701 is highly efficient anti-sticking aid, prevents hot PVC melt from sticking to functional steel parts of processing machinery. In addition, it imparts superior melt flow. It is an excellent additive to achieve effective release properties even under difficult processing conditions.

METHOD OF USE : During compounding step

USE LEVEL : 0.3 - 1.0 phr (as per end-use requirements)

STABILIZATION : Suitable for use with all commercially available stabilizers

NON-APPLICATION : Limited compatibility in plasticized PVC

STORAGE : It may form soft agglomerates during transit/storage depending upon its particle size, compaction caused during stacking of material and prevailing atmospheric temperatures during transit/storage conditions due to its fatty nature & inherent characteristics. Finer the particle size more can be such agglomeration. However, this agglomeration does not affect the product's performance. These soft agglomerates can be broken easily if necessary.
